

Guilherme Augusto Ferreira

Short CV:

Guilherme A. Ferreira graduated from Federal University of Goiás (Brazil) and got master and DSc degrees in Physical Chemistry from the University of Campinas (Brazil), with the last degree in collaboration with Lund University (Sweden). After that, he took a position as an Assistant Professor at the Federal University of Bahia (Brazil) and has been a visiting researcher in the groups of Professor Hellmut Eckert (University of São Paulo, Brazil) and Professor Bernard Binks (University of Hull, UK). His mainly research interests include the interfacial and self-assembling properties of amphiphilic (macro)molecules and structured nanomaterials for the development of new formulations, such as foams and emulsions, and their characterizations by multiple experimental techniques.
